## DETAILED ACTION

### *Claim Objections*

1. Claims 8 and 10-14 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 8 and 10-14 have not been further treated on the merits.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams (4647385).

Williams teaches a fracturing fluid which comprises a crosslinked polyacrylate, a triethanolamine and hypochlorite breaker (see Example 2).

Art Unit: 1712

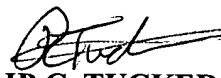

4. Claims 1, 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Argillier et al (5618780).

Argillier teaches a well fluid which comprises a polyacrylate, salts such as NaCl and K Cl, and bases such as NaOH and triethanolamine (see examples). Applicants intended use as a fracturing fluid does not distinguish (In re Pearson 181 USPQ 641).

5. Claims 2-5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Philip Tucker whose telephone number is (703) 308-0529. The examiner's normal working hours are 7:30am-4:00pm, Monday-Friday. If necessary SPE Robert Dawson may be contacted at 703-308-2340.
